<b>CMP</b> 477	<b>TARGET</b> 600 (25.80%)	<b>STOPLOSS</b> 435 (8.80%)
-------------------	-------------------------------	--------------------------------

The stock has picked up well from the important 200 period MA at 390 zone and has improved the trend moving past the 50EMA and 100 period MA zone to anticipate for further rise in the coming days. The RSI has indicated strength and has much upside potential from current levels. A decisive breach above 510 zone shall further strength the trend and can expect for further upward movement. With the chart looking good, we recommend a buy in this stock for an upside target of 600 keeping a stop loss of 435.
